

SGA21 OZONE / OXYGEN SYSTEM

The SGA21 Ozone/Oxygen System combines a high concentration, air-cooled ozone generator with an onboard oxygen concentrator in an attractive, compact, wall-mountable stainless steel housing.

The powerful SGA21 is easy to operate with a convenient, intuitive control panel. To easily manage the ozone generating process, it offers: 0-100% variable power control, feed gas control, inlet air pressure and reactor back-pressure gauges, power supply feed back reference meter, and LED ozone production indicator. The control interface includes an optional 0-10VDC or 4-20mA input signal for 0-100% variable ozone concentration control.

A highly efficient, reliable ceramic/titanium reactor cell uses our exclusive Floating Plate Technology™ and is powered by an advanced, high-frequency pulse modulated variable control power supply. Responsive, accurate ozone output control is assured by instantaneous amplitude modulation and the proven stability of our Floating Plate Technology™ reactor cell design.

The SGA21 ozone/oxygen system is engineered to meet all of the ozone process requirements found in the most demanding applications; yet it is easy to install, simple to operate, and will provide years of trouble-free operation.
